

RECOMMENDED SOLUTION:

Stores(storeID, town, address)

Existing field(s) could also be chosen as PK

Orders(orderNumber, orderDate, completed, discount, *storeID(FK)*, *itemCode(FK)*)

Pizzas(itemCode, pizzaName, *baseType(FK)*)

Bases(baseType, basePrice, calories, fat, salt)

Note: attributes from NutritionInfo included in Bases

Toppings(toppingName, category, toppingPrice, calories, fat, salt)

Note: attributes from NutritionInfo included in Toppings

PizzasToppings(*itemCode(FK)*, *toppingName(FK)*)

ALTERNATIVE SOLUTION (Bases/Toppings/NutritionInfo):

Bases(baseType, basePrice, *nutritionID(FK)*)

Toppings(toppingName, category, toppingPrice, *nutritionID(FK)*)

NutritionInfos(nutritionID, calories, fat, salt)
